Requested Date of Connection Inspection, if known: _____ (Provide min 2 working days notice.)

After your plumber has made the connection of your on-site sewer to the sewer lateral, but before the excavation is backfilled by the plumber, SMRU will inspect the hookup and installation. Corrections, if required, must be made and another inspection shall be scheduled. Call the business office at (772) 546-2511 at least 2 working days before the requested inspection date to schedule inspections.

SMRU's Water Reclamation Plant (Wastewater Treatment Plant) is a state of the art facility that uses the wastewater to produce irrigation quality water that is provided to area golf courses. All systems and plant processes, however, can be damaged or upset by introducing certain items into the wastewater stream. For these reasons, each commercial customer must comply with SMRU's Industrial Pretreatment ("IPP") Ordinance. Copies of the IPP Ordinance are available at SMRU's office: The customer shall not introduce, place or dispose of any substance, material or waste of a chemical, animal, vegetable, physical, radiological or other nature into SMRU's facilities which might be capable of causing the treatment plant to become noncompliant with governmental laws, ordinances, rules or regulations or which might be capable of rendering the treatment plant's effluent as unsuitable for golf course or

landscape irrigation or which might be capable of rendering the treatment plant's sludge as unsuitable for agricultural land enrichment or which might be capable of causing undue or unusual wear or damage to SMRU's facilities. If you have any questions concerning these restrictions, please call our office.
